

Where to get patch information corresponding data X68/030

Posted minute Cyber Club (1)

Note that because we assume that you have will be protected, game disc, the patch data of Dennou Club has so many might not be able to use the disk copy was taken with the backup tool such as file master. I think people who have to patch the main program is that it is basically impossible I'm good.

"Information" in the remarks column represents the case in which some information for the operation is on the issue published.

"IOCS46.X" also is intended to apply a patch to protect so-called routine check, I work there and do not need to do anything to actually remove the protection.

Share issue	Title	Remarks
